

RESTAURANT OWNER BRIEFING

Guests order from the table. You run the rest.

Scan the live QR on the right. That is Table L1 – the same flow your guests would use. No app to install.

TRY IT NOW

SCAN • TABLE L1

Open the live menu

Point your phone camera at this code. The kitchen screen updates the moment an order is sent.

GUEST VISIT

Five screens. One sitting.

They never wait for a menu, a waiter, or a paper bill.

5 • Pay

One bill, then rate

When they leave, staff tap **Mark paid & clear**. The next party must scan again – the old phone cannot keep ordering.

The phone is the menu, waiter, and bill.

Search & categories

Jump to Pizza, Wok, Desserts. Hide a dish the second you run out – it vanishes on every phone.

Popular & top rated

A strip of guest favourites sits above the menu so first-timers order faster.

Combos in one tap

You switch a bundle on tonight. They add the whole deal without picking each item.

Cart that stays

If they check WhatsApp mid-order, the cart is still there when they come back.

Slide to send

Name and 10-digit phone once. After that, a second round is one slide – not another form.

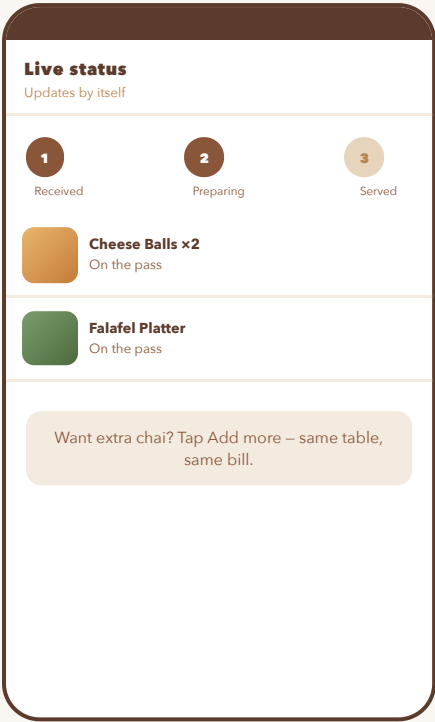

Your look

Logo, colours, fonts, tagline. The menu looks like this restaurant, not a generic food app.

AFTER THEY ORDER

They watch the kitchen. You take the money.

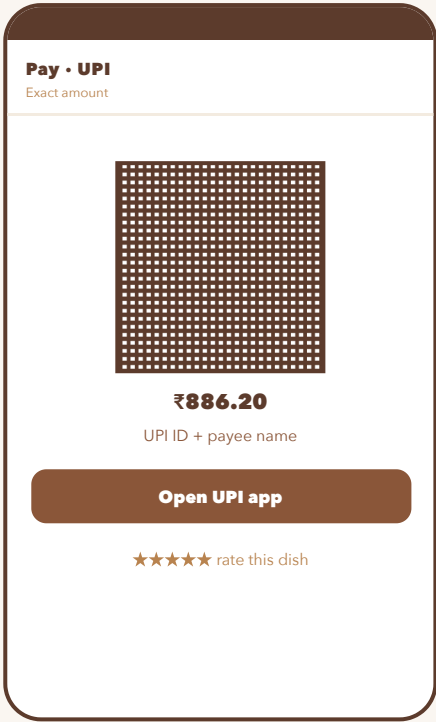

No waving at staff

Received → Preparing → Served.
Cancelled if you void it.

GST when you need it

GSTIN, CGST, SGST on the bill – or off if
you are not registered.

Pay, then rate

Stars and comments feed "Top rated" and
your Insights page.

The counter laptop is the kitchen ticket.
